

DrawLineMethod

Write a complete C++ program that produces the output shown below. For this lab, you must make a drawline method that draws a line made out of '\$' that is 10 units long. For example, if you called your drawline method from your main program, the following would be on your screen:

```
$$$$$$$$$$
```

Your main method must look like the following:

```
main()
{
    int boxcounter=0;
    int boxheight=4;

    for(boxcounter=0;boxcounter<5;boxcounter++)
    {
        for(int i=0;i<boxheight; i++)
        {
            drawline();
            cout << endl;
        }
        cout << endl;
    }
}
```

Sample output:

```
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
```

```
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
```

```
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
```

```
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
```

```
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
$$$$$$$$$$
```
